TECHNICAL REFERENCE

EDI Integration Register

Technical Reference | Opella Digital | Version 1.1

Document Reference	OPS-EU-IT-REG-001
Version	1.1
Effective Date	15 September 2025
Review Date	15 December 2025
Document Owner	Head of Opella Digital, Europe
Process Owner	EDI Integration Lead (J. Okafor)
Document Status	APPROVED
Classification	INTERNAL - RESTRICTED

Document Control

Document Information

Field	Details
Document Title	EDI Integration Register - Opella Europe
Document Reference	OPS-EU-IT-REG-001
Process Area	IT / Digital / EDI
Maintained By	Opella Digital (James Okafor, EDI Integration Lead)
Document Owner	Head of Opella Digital, Europe
Process Owner	EDI Integration Lead (J. Okafor)
Version	1.1
Last Updated	15 September 2025
Next Review	15 December 2025 (quarterly)
Classification	INTERNAL - RESTRICTED

IMPORTANT - Restricted Distribution

This document contains details of active trading partner integrations and TSA governance status. Distribution is restricted to: Opella Digital, CS Team Lead, Finance Director, and TSA Programme Office. Do not circulate to customers, external partners, or non-Opella personnel.

Version History

Version	Date	Author	Summary
1.1	15 Sep 2025	J. Okafor	Updated connection status: Tesco UK and Mercadona confirmed fully transitioned to Opella Digital management. Boots UK new connection added (went live 01 Aug 2025). TSA status column clarified. Connections 9-14 remain Sanofi Shared Services managed.
1.0	01 May 2025	J. Okafor	Initial register at Opella operational independence. Reflects EDI landscape at April 2025 carve-out. 8 connections under Opella Digital management, 6 under Sanofi Shared Services TSA.

1. Purpose and Scope

1.1 Purpose

This register documents all active Electronic Data Interchange (EDI) connections between Opella Europe and its retail and pharmacy trading partners. It records the connection configuration, managing entity, operational status, and TSA governance status for each connection.

The register provides the authoritative reference for:

- Identifying the management responsibility for each EDI connection.
- Understanding which connections remain subject to the Sanofi Transition Services Agreement (TSA) and where to direct operational queries.
- Tracking the migration timeline for TSA-managed connections.
- Supporting incident management and customer escalation handling.

1.2 Scope

The register covers all EDI connections between Opella Europe and external trading partners, including connections that are currently managed by Sanofi Shared Services under the TSA. It does not cover:

- Web portal or API-based order integrations (documented separately).
- Internal system integrations between Opella entities.
- EDI connections in markets outside the Opella Europe commercial region.
- Connections in setup or testing phase (not yet live in production).

1.3 Relationship to Other Documents

This register is referenced in the Order Management SOP (OPS-EU-CS-SOP-001, Section 1.3) and the EDI Dispute Resolution Working Notes (OPS-EU-IT-WN-001). Operational queries regarding specific connections should be directed per the contact information in Section 5.

2. Architecture Overview

2.1 EDI Platform

Opella Digital manages active EDI connections through the Opella Europe EDI platform (IBM Sterling B2B Integrator, hosted on Opella private cloud, Frankfurt). All Opella Digital-managed connections in this register are routed through this platform.

Connections managed by Sanofi Shared Services remain on the Sanofi EDI platform (SAP Integration Suite, managed by Sanofi Global IT) under the terms of the TSA. These connections will be migrated to the Opella platform per the migration schedule in Section 4.

2.2 Message Types in Use

EDI Message	Standard	Description
ORDERS	EDIFACT D96A	Inbound purchase order from trading partner.

ORDRSP	EDIFACT D96A	Outbound order acknowledgement/confirmation.
DESADV	EDIFACT D96A	Outbound advance ship notice (ASN).
INVOIC	EDIFACT D96A	Outbound invoice.

3. Active Connections Register

All 14 active production EDI connections as of the document update date are listed below. Connections are categorised by managing entity: 8 under Opella Digital management (connections 1-8) and 6 remaining under Sanofi Shared Services management under TSA terms (connections 9-14).

#	Customer	Ctry	Message Types	Status	Managed By	TSA Status
1	Tesco UK	UK	ORDERS / ORDRSP / DESADV / INVOIC	Live	Opella Digital	N/A - Opella owned
2	Mercadona	ES	ORDERS / ORDRSP	Live	Opella Digital	N/A - Opella owned
3	REWE Group	DE	ORDERS / ORDRSP	Live	Opella Digital	N/A - Opella owned
4	Boots UK (new)	UK	ORDERS / ORDRSP	Live (since 01 Aug 2025)	Opella Digital	N/A - Opella owned
5	Alliance Healthcare	EU	ORDERS / DESADV	Live	Opella Digital	N/A - Opella owned
6	Rite Aid Europe	EU	ORDERS / ORDRSP	Live	Opella Digital	N/A - Opella owned
7	Aldi Europe	EU	ORDERS	Live	Opella Digital	N/A - Opella owned
8	Coop Group (new)	EU	ORDERS / ORDRSP / INVOIC	Live	Opella Digital	N/A - Opella owned
9	Carrefour France	FR	ORDERS / ORDRSP / INVOIC	Live	Sanofi Shared Services	See TSA Schedule Annex C
10	Boots UK (legacy)	UK	ORDERS / ORDRSP / INVOIC	Live	Sanofi Shared Services	See TSA Schedule Annex C
11	dm (Drogerie Markt)	DE	ORDERS / ORDRSP	Live	Sanofi Shared Services	See TSA Schedule Annex C

1 2	E.Leclerc	FR	ORDERS / ORDRSP / DESADV	Live	Sanofi Shared Services	See TSA Schedule Annex C
1 3	Lidl Europe	EU	ORDERS / ORDRSP	Live	Sanofi Shared Services	See TSA Schedule Annex C
1 4	Coop Group (legacy)	EU	ORDERS / INVOIC	Live	Sanofi Shared Services	See TSA Schedule Annex C

4. TSA-Managed Connections - Transition Status

4.1 TSA Governance

Connections 9-14 in Section 3 are operated by Sanofi Shared Services under the terms of the Transition Services Agreement (TSA) between Opella and Sanofi. Under the TSA, Sanofi continues to provide EDI connectivity services for these six trading partners until each connection is formally transferred to Opella Digital management.

The specific service terms, SLAs, handover process, and migration timeline for these connections are defined in TSA Schedule Annex C. TSA Schedule Annex C is a separate controlled document held by the Opella TSA Programme Office and is not reproduced in this register.

TSA SCHEDULE ANNEX C

The terms governing connections 9-14 are set out in TSA Schedule Annex C.
For questions about SLAs, incident response, or migration timelines for TSA-managed connections, contact the Opella TSA Programme Office.

DO NOT contact Sanofi IT directly for operational issues on these connections without first notifying the TSA Programme Office - all contact with Sanofi Shared Services must be managed through the TSA governance framework.

4.2 TSA Connection Migration Overview

Connect	Customer	Target Migration Q	Migration Lead	Status
9	Carrefour France	Q4 2025	J. Okafor	Technical scoping in progress.
10	Boots UK (legacy)	Q1 2026	J. Okafor	Decommission pending: Boots UK new connection (#4) already live.
11	dm (Drogerie Markt)	Q1 2026	J. Okafor	Pre-scoping. Awaiting Sanofi handover documentation.
12	E.Leclerc	Q2 2026	TBD	Not yet scoped. Volume complexity requires dedicated resource.
13	Lidl Europe	Q2 2026	TBD	Not yet scoped. Multi-country routing requires review.
14	Coop Group (legacy)	Q3 2026	TBD	Planned decommission: Coop new connection (#8) already live.

Migration targets are indicative and subject to TSA Programme Office confirmation. All targets for connections 12-14 are provisional pending technical scoping. The Opella Digital team will update this section quarterly as part of the standard register review.

5. Support and Incident Management

5.1 Opella Digital-Managed Connections (1-8)

For connections managed by Opella Digital (connections 1-8), all incidents and operational queries must be directed to:

Contact	Details	Hours
EDI Integration Lead	James Okafor - james.okafor@opella.com - +44 7700 900 123	Mon-Fri 08:00-18:00 CET
Opella Digital IT Helpdesk	helpdesk.digital@opella.com - ticket portal: jira.opella.com/edi	Mon-Fri 08:00-20:00 CET

Priority	Definition	Response SLA	Resolution SLA
P1 - Critical	Connection fully down; orders not transmitting for accounts with daily order volume > EUR 500K.	30 minutes	4 business hours
P2 - High	Connection degraded; intermittent failures or message errors affecting order processing for any active connection.	2 business hours	1 business day
P3 - Normal	Non-critical issues: mapping queries, test message failures, minor configuration requests.	1 business day	5 business days

5.2 TSA-Managed Connections (9-14)

For connections managed by Sanofi Shared Services (connections 9-14), incident and support escalation must follow the TSA governance process. CS Representatives and CS Team Lead must NOT contact Sanofi IT directly. All incidents must be reported to the Opella Digital team, who will escalate through the TSA framework.

- First contact: Opella Digital (J. Okafor) - who will determine whether the issue is Opella-side or Sanofi-side and escalate accordingly.
- For Sanofi-side issues: Opella Digital submits a TSA incident ticket to Sanofi Shared Services EDI support. SLAs are governed by TSA Schedule Annex C.
- Escalation for unresolved TSA incidents: Opella TSA Programme Office.

6. Register Maintenance and Governance

This register is reviewed quarterly by Opella Digital. Changes to connection status, management ownership, or TSA classification must be notified to the EDI Integration Lead within five business days of the change taking effect. The following types of change trigger an immediate (unscheduled) update:

- Addition or decommission of a production connection.
- Transfer of a connection from TSA to Opella Digital management.
- Material change to a connection's message types or technical configuration.

- Change to the TSA migration target date for connections 9-14.
